

Wondering what to do with old computers and devices?

Our e Waste Recycling Program is designed to dispose of your unused computers, monitors, printers, and other devices securely and safely. Our program is environmentally responsible and you have the added comfort of knowing that your digital data is rendered completely inaccessible to anyone.

✓ Protect your data and the environment

What does QualityIP do with the equipment?

- ✓ Our recycling partner extracts all precious metals for appropriate re-use and properly disposes of the remaining contents in accordance with EPA standards.
- ✓ Your old data storage devices such as hard drives, solid state drives, circuit boards, thumb drives and memory cards are destroyed by our state-of-the-art hard drive shredder, which meets Department of Defense and HIPPA security standards.

What is the cost?

- ✓ **Servers:** \$20.00 each
- ✓ **Hard Drives and other data storage devices:** \$12.00 each*
- ✓ **Other devices:** \$12.00 each includes monitors, printers, keyboards, batteries, cell phones, etc.

*Bring us your unmounted hard drives and save! 10 or more drives unmounted and without brackets—only \$6.00 each.
